Full-Stack Developer

Experienced in software development lifecycle implementation, quality assurance, and building scalable, resilient applications while integrating best practices across development pipelines and production environments.

WORK EXPERIENCE

La Fabbrica Delle Idee • 11/2025 - 1/2026

Software Engineer and WordPress Security Audit

- B&B Hospitality Website |

<https://bnblafabbricadelleidee.it/>

- Engineered a full-stack fashion platform through the complete SDLC, implementing automated CI/CD pipelines from development to production.
- Designed scalable system architectures with cloud infrastructure, optimized databases, and resilient service communication patterns.
- Performed WordPress penetration testing for an Italian B&B site, patching critical plugin vulnerabilities and hardening security configurations.

Annaelle Piovesan • 06/2025 - 12/2025

Software Engineer | <https://anaellepiovesan.com>

- Led the full software development lifecycle for a modern fashion industry platform, from concept to deployment. Engineered a robust CI/CD pipeline enabling rapid, reliable releases while maintaining high code quality and team collaboration.
- Frontend & Profile Display: Developed the public-facing website with a focus on user experience, including a dynamic user profile display system to showcase portfolios and professional information.
- CI/CD Pipeline Development: Built and automated a continuous integration and deployment pipeline using tools like GitHub and docker, reducing deployment time by 40% and ensuring consistent production readiness.

David Doro • 01/2026 - 03/2026

Software Engineer | <https://dorodavid.com/> , | <https://dorodavid.it>

- Currently developing a fully explorable, canvas-based personal portfolio platform in progressive stages, starting with a soft-launch homepage and scalable project templates.
- Building a custom CMS dashboard for real-time content management, enabling dynamic project uploads, media handling, and bilingual support (EN/IT).
- Designed a modular, visually driven user experience where projects are displayed as navigable cards on an interactive canvas before individual detail views go live
- Implementing phased rollout strategy—homepage first, followed by canvas exploration, CMS integration, and templated project pages—to ensure iterative delivery and UX refinement.

PROJECTS

AI-Powered Phishing Detection Mobile App

- Developed a React Native application that uses machine learning models to scan and analyze URLs and emails for phishing indicators in real-time.
- Engineered the backend to process and classify potential threats, providing users with immediate security alerts.

Competitive Cybersecurity Events

- Participated in high profile ctf competition such as PicoCTF, Cyberweek, East Africa Intervarsity CTF, and BSides Nairobi
- Achieved 3rd place during the I&M Bank ctf held on september 2025
- Dove into practical labs on tryhackme.com and hack the box gaining hands on experience

EDUCATION

Bachelor of Science in Information Technology

Dedan Kimathi University of Technology • 09/2022 - 02/2026 (to graduate - 5/2026)

CERTIFICATIONS

Cisco Certified Network Associate (CCNA)

Cisco

SKILLS

Tools: Github, Vercel, Clerk, Convex, Wordpress, Burp suite, Elastic, Metasploit, Wazuh, Wireshark

Soft Skills: Collaboration, Communication, Innovative Solutions Development

Programming: Next.js, Python, Angular
